

Kathryn Sarullo

Kathryn Sarullo is a Computer Science PhD Candidate at Washington University in St. Louis working under S. Joshua Swamidass. She is currently involved in several research projects where she applies deep learning to complex domain spaces such as medicine, healthcare, and chemical biology, including a study of disentangling and identifying the source of effects for socioeconomic status and other social factors that often correlate with race. She is a strong advocate for women in STEM and stays involved in her university's efforts, as well as community's efforts, to encourage women to join STEM fields.
