

Natalie Slopen, Sc.D.

Dr. Natalie Slopen is an Assistant Professor in the Department of Social and Behavioral Sciences at Harvard T. H. Chan School of Public Health. She is also an affiliated faculty member at the Center on the Developing Child at Harvard University and the Francois-Xavier Bagnoud (FXB) Center of Health and Human Rights at Harvard University. Previously, she served six years on the faculty in the Department of Epidemiology and Biostatistics at the University of Maryland, College Park, School of Public Health. Dr. Slopen received her Doctor of Science from Harvard T. H. Chan in 2010 and completed postdoctoral training at the Center on the Developing Child at Harvard University. As a social epidemiologist, Dr. Slopen works on a range of studies on topics related to the social and structural determinants of children's health and health disparities across the life course. Her research has focused on the role of socioeconomic disadvantage, racism, housing, and other adverse experiences for children's mental and physical health outcomes, and she has contributed to more than 100 scientific publications. In 2019, Dr. Slopen served on the National Academies of Sciences, Engineering, and Medicine's *Committee* that produced *Vibrant and Healthy Kids: Aligning Science, Practice, and Policy to Advance Health Equity*.
