Virtual Meeting • Part Two–August 10-12, 2021

Topic-Based Discussion: Data & Quality Assurance

Thursday, August 12, 2021

What is Quality Assurance?

Quality Assurance (QA) is:

- A way of preventing mistakes and avoiding problems when delivering products or services to customers;

- Providing confidence that quality requirements will be fulfilled internally to management and externally to customers.

Importance of Data Accuracy

- Data accuracy is vital to the success of an organization's data management efforts.

- Poor and incomplete data collection, as well as a lack of quality data, can cause an inability to accurately assess performance, leading to wasted dollars and poor decision making.

- Accurate and complete data helps to make better decisions, produce better outputs, and increase efficiencies, as well as lower risks in outcomes.

Reports and Searches

- What STARS/SIRS reports/searches do you find most helpful?

- What tools or resources do you think could assist you?

Challenges

- How do you address these sentiments?
    - I am too busy to enter data
    - I want to help people, not enter data
    - This is the "way we've always done it."
- What intimidates you and/or are your biggest barriers around data reporting and data accuracy?
- What tools or resources do you think could assist you?

Processes

- Do you and/or your team members regularly look for data inaccuracies in STARS/SIRS? If so, what is your process?

- What tools or resources do you think could assist you?

- Which TA Center tools and materials do you use?

Training

- What standards have you set for when a contact should also be sent to the SMP and/or MIPPA?
    - Every contact, no matter what
    - Just mentioning the SMP/SHIP/MIPPA partner agency name
    - Providing partner materials (brochures, flyers, etc.)

- How do you train team members to collect demographic information like race, gender, and income?

- How do you ensure team members report their time on the activity form?

- What materials do you use to train staff?

- What tools or resources do you think could assist you?
