

Marcus M. Weera, Ph.D.

Dr. Weera is a Postdoctoral Fellow in the Department of Physiology at Louisiana State University Health Sciences Center (LSUHSC). Dr. Weera received his Ph.D. in Integrative Neuroscience from Purdue University and he is currently completing his postdoctoral training in the lab of Dr. Nicholas Gilpin at LSUHSC. Dr. Weera's research is focused on elucidating the neurobiology underlying individual differences in stress reactivity and stress-induced alterations of alcohol-related behaviors, using a combination of circuit-based, pharmacological, histochemical, and anatomical approaches. Dr. Weera is a member of the Society for Neuroscience, the Research Society on Alcoholism, and the International Behavioural and Neural Genetics Society.
