Consider...

Key Concepts for Consideration

- Social Capital
- Collective Impact
- Social Determinants of Health
- Community Organizing
- Scaling

Key Concepts for Consideration

- **Social Capital**
- Collective Impact
- Social Determinants of Health
- **Community Organizing**
- Scaling

Comprehensive Prevention Programming

- Target common risk factors
- Collaborate
- Conduct epidemiological needs assessments
- Implement evidence-based, culturally and developmentally appropriate prevention services
- Intervene in multiple settings
- Address common risk factors

Summary

- Population-level change is not individual level change;
- Comprehensive prevention program must be ecological and multi-sector in nature, development, and implementation; and
- Concepts like social capital and community organizing must be scaled
 - Note: How do we do these things in the era of COVID?
