

### **Cherie Rooks-Peck, Ph.D., RD**

**Cherie Rooks-Peck, PhD, RD**, is a Lead Health Scientist and Acting Team Lead of the Applied Prevention Science Team in the Division of Overdose Prevention at the Centers for Disease Control and Prevention. Dr. Rooks-Peck currently supervises a team of scientists examining methods to improve program implementation for CDC recipients funded through our various drug overdose prevention opportunities. Additionally, she leads efforts in the Division to address health equity and social determinants of health. These efforts include building capacity of CDC staff on issues related to health equity and drug overdose, as well as supporting CDC recipients and their efforts to address health equity. Dr. Rooks-Peck has 8 years of public health experience at the CDC examining various topics including HIV/AIDS prevention, mental health, and obesity. Prior to joining CDC, she completed a post-doctoral fellowship in Epidemiology at Emory University's Rollins School of Public Health. Dr. Rooks Peck has a PhD in Kinesiology and a MS in Foods and Nutrition from the University of Georgia.
